CSS Syntax Practice

Correct all mistakes you find in the following code examples:

Syntax: selector {property: value;}

1.

```
<p> {text-align: left;}
```

2.

```
h1 {  
  color: red  
  text-align: center  
}
```

3.

```
li {  
  color: green;  
  font-weight: bold;
```

4.

```
p { color; blue; }
```

5.

```
li font-size: 12px;
```

6.

```
li {  
  color="red";  
}
```

7.

```
h2 {text-decoration:underline;}
```

8.

```
h1  
  font-family: Courier;  
  font-weight: bold;  
  text-align: center;  
}
```

CSS Syntax Practice

Answer Key

1. `<p> {text-align: left;}` has greater and less than signs around the selector and should be `p {text-align: left;}`
2. Both the red and center property values should end with semicolons
3. Missing the closing curly bracket
4. `p { color; blue; }` uses a semicolon in place of a colon and should be `p { color: blue; }` (white space does not matter)
5. `li font-size: 12px;` is missing both curly brackets and should be `li {font-size: 12px;}`
6. `color="red";` should be `color:red;`
7. No errors.
8. Missing the opening curly bracket
